This collection of multi-cultural tales and music is breathtaking. The selection of folk stories from Ecuador, India, Africa and the Lakota People is excellent, as is Armstrong's original Mzizi's Great Adventure. What sets this apart from other storytelling tapes is the opening music for each story, reflecting the tale's culture. The musical selections are so powerful, they could be an album unto themselves. The production is outstanding, with clear narration enhanced by lovely sound effects and background instrumentation. Age: Family.
